

VACANCY

Jones & Shipman Grinding Ltd is an internationally renowned Precision CNC Machine Tool manufacturer. Part of the Hardinge Group, we are developing new markets and are positioned for sustained growth worldwide. To help achieve our ambitious plans for the future we are seeking an experienced Design Engineer for the following position:

Mechanical Design Engineer

The focus of the post will be to apply your skills for the design of machines and complex mechanisms using a modern 3D CAD system. You will need to have knowledge of machine tool design methods and mechanical systems for various motion control solutions including servo systems.

You will be self motivated with the ability to analyse problems and logical thought processes to arrive at design solutions, and possess a practical ability to assist with machine build problem solving.

An attractive salary is negotiable on experience and conditions of employment are those normally associated with a large successful employer.

Any interested persons who can meet the above criteria should apply in writing providing details of their qualifications and experience to Julie Taylor at Jones & Shipman Grinding Limited, Murrayfield Road, Braunstone Frith Industrial Estate, Leicester LE3 1UW, England.
